MEMORANDUM FOR THE CHAIRMAN, COMPARTMENTATION SUBCOMMITTEE, USIB

SUBJECT: Revision of DCID 1/7

REFERENCES: (a) Memorandum for the Chairman, Compartmentation
Subcommittee, subject as above, dated 30 April 75

(b) DCID 1/7 Draft #7, dated 16 May 75

1. After review of the proposed language in paragraph 5 (5), page 9 of reference (b), I am concerned that control marking "NOT RELEASABLE TO FOREIGN NATIONALS" carries no provision for abbreviation when used for other than "Special Purposes". The common usage of this caveat has been in its abbreviated form "NO FOREIGN DISSEM." This term has, to our knowledge and experience, worked quite effectively for years within the intelligence community. Further, we have no substantive evidence that "NO FOREIGN DISSEM" has caused confusion.

2. I believe that a reeducation process of the many individuals and organizations that would be necessary by eliminating "NO FOREIGN DISSEM" would cause confusion and misunderstanding. Additionally, the requirement to manufacture new stamps will prove costly. (See reference (a)).

3. I therefore propose the following addition to paragraph 5 (5) immediately following "NOT RELEASABLE TO FOREIGN NATIONALS" "(may be abbreviated "NO FOREIGN DISSEM")".

4. Should it be the consensus of the members of the subcommittee that paragraph 5 (5) be approved as written, I must nonconcur. In this event, I request that my dissenting views - together with my proposed wording for paragraph 5 (5), be included in any submission to the Security Committee.
